

Perbandingan dan Urutan Angka hingga 1000 - Yuki

Created: 6/14/2026

Student

Student: Yuki

Topic: Perbandingan dan Urutan Angka hingga 1000

Status: completed

Lesson Plan

Learning Objectives

- Compare two numbers up to 1000 using the symbols $>$, $<$, and $=$ correctly.
- Arrange a set of five numbers up to 1000 in both ascending and descending order.
- Solve logic-based number riddles involving range and place value constraints.

Lesson Information

Lesson Sections

1. Spiral Review Warm-up (10 minutes)

Teacher Script:

Hi Yuki! Today we are starting a secret mission, but first, we need to unlock our detective tools! Let's do a quick warm-up. Look at the whiteboard. Can you tell me: What is the value of the digit 7 in the number 732? Correct! Now, how about $400 + 50 + 8$... what number does that make? Great. Now let's jump back to our small numbers: Which is bigger, 12 or 19? And finally, if I have 15 stickers and give 5 away, how many are left? You are ready!

Activities:

- *Place Value Check: Identify Hundreds, Tens, Ones in 732 and 805.*
- *Expanded Form: Combine $400+50+8$ into a single number.*
- *Small Number Compare: Identify the larger of two numbers under 20.*
- *Quick Mental Math: Solve $15 - 5$ and $10 + 7$.*

2. Introduction & Real-World Connection (5 minutes)

Teacher Script:

Yuki, imagine you are at a Toy Store. You have two LEGO sets. One costs 450 thousand and the other costs 540 thousand. Which one is more expensive? To find out, we use special 'Alligator Mouth' signs! Today, we will learn how to use these signs to compare big numbers up to 1000.

Activities:

- *Discussion about prices at a store.*
- *Introduction to the 'Alligator' ($>$ and $<$) concept.*

3. Review of Prior Knowledge (5 minutes)

Teacher Script:

Before we compare, let's remember our secret rule. We ALWAYS look at the Biggest Room first—the Hundreds room! If I have 300 and 200, 300 is always bigger, right? Even if the other numbers are small. Let's practice clicking on the Hundreds place for these three numbers.

Activities:

- *Highlighting the Hundreds digit in 3-digit numbers.*
- *Comparing two numbers where only the hundreds digit differs.*

4. Problem Introduction (10 minutes)

Teacher Script:

Detective Yuki, look at these two numbers: 456 and 482. The Hundreds are the same! What do we do? We move to the next room—the Tens! Which is bigger: 5 tens or 8 tens? Exactly! So, 482 is bigger. Let's draw the alligator mouth eating the 482. Crunch, crunch!

Activities:

- *Step-by-step comparison: Hundreds first, then Tens, then Ones.*
- *Introduction of the '=' sign for identical numbers.*

5. Guided Practice (15 minutes)

Teacher Script:

Now, let's organize our secret files. I have five numbers: 231, 105, 890, 450, and 120. We need to put them from Smallest to Biggest. Which one has the smallest Hundreds? Yes, 105 and 120. Between those two, which is smaller? Let's move them into the boxes together.

Activities:

- *Sorting activity: Dragging cards into a train from smallest to largest.*
- *Reverse sorting: Largest to smallest.*
- *Filling in the blanks with correct symbols.*

6. Independent Practice (15 minutes)

Teacher Script:

Time for the Solo Riddle Challenge! I will post a riddle in the chat. 'I am a number between 450 and 460. My last digit is 5.' What am I? Type your answer! Now, here are 3 more challenges on your screen. You have 5 minutes to solve them all!

Activities:

- *Logic Riddle: Finding a hidden number using place value clues.*
- *Symbol Match-up: 5 quick-fire comparison questions.*
- *Ordering Challenge: Sort 678, 687, 670, 768.*

7. Consolidation & Reflection (5 minutes)

Teacher Script:

You did it, Detective Yuki! You mastered the big numbers. Remember: Always check the Hundreds first! Tomorrow, we'll use these skills for addition. Don't forget to visit <https://learn.algonova.id/login> to see your rewards and homework. What was the hardest part today? You handled it like a pro!

Activities:

- *Recap of the 'Hundreds-Tens-Ones' check rule.*
- *Verbal reflection on the lesson.*

Homework

Medium Questions:

1. Use $>$, $<$, or $=$ for: 567 ____ 576
2. Use $>$, $<$, or $=$ for: 801 ____ 799
3. Order these from Smallest to Largest: 340, 120, 560, 210
4. Circle the largest number: 445, 454, 405, 544

Hard Questions:

1. Order these from Largest to Smallest: 909, 990, 919, 999, 1000
2. Logic Riddle: I am bigger than 700 but smaller than 710. My ones digit is 2. What number am I?
3. Logic Riddle: I have 4 in the hundreds place. I am between 420 and 430. I am an even number that ends in 6. Who am I?
4. True or False: 8 hundreds + 2 tens is greater than 7 hundreds + 12 tens? Explain.
5. REVIEW: Place Value hingga 1000 - Write the value of the underlined digit in 9_4_2.
6. REVIEW: Place Value hingga 1000 - What is the largest 3-digit number you can make using digits 1, 9, and 5?

Answer Key:

1. < (567 is less than 576)
2. > (800 is more than 700)
3. 120, 210, 340, 560
4. 544
5. 1000, 999, 990, 919, 909
6. 702
7. 426
8. False. (820 is equal to 820 since $700 + 120 = 820$)
9. REVIEW: 40 (Tens place)
10. REVIEW: 951
11. REVIEW: Assessment 1-20 - 18 (Medium)
12. REVIEW: Assessment 1-20 - 7 (Hard - logic comparison)

Parent Reminder

Today's Math Mission: Big Numbers!

Hi! Yuki did a great job today comparing and ordering numbers up to 1000. We practiced using the > and < symbols and solved some number riddles. To keep the momentum going, please ask Yuki to compare prices or house numbers next time you're out! Don't forget to log in to <https://learn.algonova.id/login> for the homework and extra fun.
