

Pengurangan 3-digit dengan Meminjam (dari Puluhan & Ratusan)

Created: 8/1/2026

Student

Student: Yuki

Topic: Pengurangan 3-digit dengan Meminjam (dari Puluhan & Ratusan)

Status: completed

Lesson Plan

Learning Objectives

- Calculate the difference of two 3-digit numbers involving regrouping from the tens and hundreds places.
- Solve word problems involving 'difference' or 'how many more' using 3-digit subtraction models.
- Verify the accuracy of subtraction results by applying the inverse operation of addition.

Lesson Information

Lesson Sections

1. Spiral Review Warm-up (10 minutes)

Teacher Script:

Hi Yuki! Welcome back to our math mission. Before we blast off to new stars, let's check our rocket's sensors with a quick review. I'm going to put some numbers on the screen. For the first two, tell me the place value of the underlined digit. Then, for the next two, give me the quick answer in the chat! Ready? 3... 2... 1... Go!

Activities:

- *Place Value Check 1: 458 (Identify 5 as tens)*
- *Place Value Check 2: 902 (Identify 9 as hundreds)*
- *Number Fluency 1: $15 - 7 = ?$*
- *Number Fluency 2: $8 + 6 = ?$*

2. Introduction & Real-World Connection (5 minutes)

Teacher Script:

Great job, Captain Yuki! Today, we are on a mission to deliver supplies to a space station. We have 425 fuel canisters, but the journey requires 187. We need to know exactly how many we will have left! Subtraction helps us plan our journey so we don't get stuck in space. Does that sound like a plan?

Activities:

- *Scenario visualization: Drawing a rocket ship and fuel canisters.*

3. Review of Prior Knowledge (5 minutes)

Teacher Script:

Let's look at the number 425. If I want to take away 7 units, but I only have 5 units in the 'Ones' column, what can I do? Remember our 'Trading Rule'? We can take 1 Ten and trade it for 10 Ones! Let's practice one quick trade on the board.

Activities:

- *Interactive trading exercise: Drag 1 'Ten' rod to the 'Ones' box to see it break into 10 'Ones' cubes.*

4. Problem Introduction (10 minutes)

Teacher Script:

Now, let's look at 425 minus 187. Oh no! 5 is smaller than 7, and 2 is smaller than 8! We need to borrow twice. Watch me: First, we go to the Tens. We borrow 1 Ten, so 2 becomes 1, and 5 becomes 15. 15 minus 7 is 8! Next, we go to the Hundreds. We borrow 1 Hundred, so 4 becomes 3, and our 1 Ten becomes 11 Tens. 11 minus 8 is 3! Finally, 3 minus 1 is 2. Our answer is 238!

Activities:

- *Step-by-step walkthrough of $425 - 187$ using color-coded columns.*

5. Guided Practice (15 minutes)

Teacher Script:

Your turn, Captain! Let's solve $532 - 256$. I'll help you. Look at the Ones first. Can we take 6 from 2? No? Okay, let's go next door to the Tens! You write the new numbers on the screen.

Activities:

- *Student solves two 3-digit problems with teacher guidance: $532 - 256$ and $713 - 345$.*
- *Verification check: Yuki adds the answer back to the smaller number to see if it reaches the original total.*

6. Independent Practice (15 minutes)

Teacher Script:

You're doing great! I'm going to put 3 'Space Challenges' on the board. Try to solve them on your own. If you get stuck, call for Mission Control (that's me!) and I'll give you a hint.

Activities:

- Solve $641 - 273$.
- Solve $822 - 455$.
- Word Problem: Yuki has 500 star stickers. She gives 125 to her friend. How many does she have left?

7. Consolidation & Reflection (5 minutes)

Teacher Script:

Mission accomplished! You mastered double borrowing today. Remember, if the bottom number is bigger, we just go next door and borrow! Before you go, don't forget to join <https://learn.algonova.id/login> to see your space trophies and today's lesson notes. See you next time!

Activities:

- Reflecting on the 'Borrowing' rule.
- Quick high-five via webcam.

Homework

Medium Questions:

1. $342 - 128 =$
2. $563 - 247 =$
3. $481 - 156 =$
4. $972 - 348 =$

Hard Questions:

1. $524 - 189 =$
2. $713 - 456 =$
3. $632 - 275 =$
4. $841 - 367 =$
5. $400 - 125 =$
6. $911 - 588 =$

Answer Key:

`Medium: 1. 214, 2. 316, 3. 325, 4. 624`

`Hard: 1. 335, 2. 257, 3. 357, 4. 474, 5. 275, 6. 323`

`REVIEW: Place Value - 1. 50 (Tens), 2. 800 (Hundreds), 3. 3 (Ones), 4. 100 (Hundreds)`

`REVIEW: Numbers 1-20 - 1. 11, 2. 6, 3. 18, 4. 9`

Parent Reminder

Rocketing through Subtraction! 🚀

Yuki did a fantastic job today learning how to 'borrow' from tens and hundreds to solve big subtraction problems. We used a space theme to keep things exciting! Please encourage Yuki to complete the homework on the portal to lock in these new skills. See you at the next mission!
