

Pengurangan 3-digit tanpa Meminjam - Yuki

Created: 7/25/2026

Student

Student: Yuki

Topic: Pengurangan 3-digit tanpa Meminjam

Status: completed

Lesson Plan

Learning Objectives

- Calculate the difference between two 3-digit numbers without regrouping using the vertical method.
- Solve mental math problems involving the subtraction of hundreds (e.g., $800 - 300$).
- Apply subtraction skills to solve real-world word problems involving remaining quantities.
- Represent 3-digit numbers correctly based on Place Value (Hundreds, Tens, Ones).

Lesson Information

Lesson Sections

1. Spiral Review Warm-up (10 minutes)

Teacher Script:

Hi Yuki! Are you ready for some math magic today? Before we start our adventure, let's unlock some gates from our previous travels. Look at the screen! For our first gate: Can you tell me what the place value of the '5' is in the number 528? Perfect! Now, what is 15 minus 7? Great job! Let's try two more: What number is 3 hundreds, 0 tens, and 4 ones? And finally, if I have 20 cookies and eat 5, how many are left? You are on fire!

Activities:

- *Place Value Identification: 528 (Identify 5 as hundreds)*
- *Numbers 1-20: Quick subtraction (15-7)*
- *Place Value Construction: 3 hundreds, 0 tens, 4 ones (304)*
- *Numbers 1-20: Word problem (20-5)*

2. Introduction & Real-World Connection (5 minutes)

Teacher Script:

Imagine you are a treasure hunter, Yuki! You found a chest with 856 gold coins. You want to give 324 coins to your friends. How many will you have left? Today, we are going to learn how to subtract big 3-digit numbers so easily that you'll feel like a math wizard!

Activities:

- *Storytelling: The Treasure Chest*
- *Goal Setting: Subtracting big numbers without 'stealing' (borrowing) from neighbors.*

3. Review of Prior Knowledge (5 minutes)

Teacher Script:

Remember our friendly Place Value columns? Let's draw them: H for Hundreds, T for Tens, and O for Ones. If I write $400 - 100$, we only look at the 'H' column. What is 4 minus 1? Yes, 3! So 400 minus 100 is 300. It's just like subtracting small numbers but with two zeros tagging along!

Activities:

- *Mental Math: 900-400, 700-200.*
- *Labeling columns: H-T-O on the whiteboard.*

4. Problem Introduction (10 minutes)

Teacher Script:

Now, let's look at a bigger challenge: $567 - 234$. We stack them like blocks! Always start from the right side—the Ones. 7 minus 4 is... 3! Now the Tens: 6 minus 3 is... 3! And the Hundreds: 5 minus 2 is... 3! Our answer is 333. See? We just do three small subtractions!

Activities:

- *Step-by-step demonstration of vertical subtraction.*
- *Color-coding columns (Ones=Blue, Tens=Red, Hundreds=Green).*

5. Guided Practice (15 minutes)

Teacher Script:

Now it's your turn to guide the pen! I'll put a problem on the screen: $895 - 451$. Which column do we start with? Correct, the Ones! What is 5 minus 1? (Wait for Yuki's answer). Excellent. Now the Tens: 9 minus 5? Great. Finally, the Hundreds: 8 minus 4? You got it! What is the total answer? Type it in the chat box!

Activities:

- *Solving 3 problems together: 895-451, 672-260, 444-123.*
- *Yuki uses the 'remote control' or 'annotate' tool to write the numbers.*

6. Independent Practice (15 minutes)

Teacher Script:

You are a pro! I'm going to give you 4 'Boss Level' challenges. Try to solve them on your own. If you get stuck, remember: Ones, then Tens, then Hundreds. Go for it!

Activities:

- *Independent Worksheet: 987-123, 555-555, 789-604, 321-210.*
- *Word Problem: A baker has 458 cupcakes and sells 236. How many are left?*

7. Consolidation & Reflection (5 minutes)

Teacher Script:

Yuki, you did amazing! Today you learned how to subtract massive numbers just by looking at their place value. What was your favorite part? (Wait for response). Before you go, don't forget to show your parents your amazing work. Remember to join <https://learn.algonova.id/login> and go to the lesson to find your homework. See you next time!

Activities:

- *Recap of the 'Start from the Ones' rule.*
- *Self-reflection: Thumbs up if it was easy!*

Homework

Medium Questions:

1. $476 - 134 =$
2. $892 - 581 =$
3. $657 - 243 =$
4. $999 - 777 =$

Hard Questions:

1. A forest has 895 trees. If 462 trees are pine trees and the rest are oak, how many oak trees are there?
2. Solve: $708 - 203 =$
3. Find the difference between 945 and 621 using the vertical method.
4. A book has 368 pages. Yuki has read 145 pages. How many pages are left?
5. $879 - 300 =$ (Use mental math for the hundreds!)
6. $542 - 541 =$

Answer Key:

Medium: 1. 342, 2. 311, 3. 414, 4. 222

Hard: 1. 433, 2. 505, 3. 324, 4. 223, 5. 579, 6. 1

REVIEW: Place Value - 1. 300, 2. 70, 3. 582, 4. 901

REVIEW: Numbers 1-20 - 1. 9, 2. 6, 3. 5, 4. 11

Parent Reminder

Ready for Big Numbers!

Hi! Yuki did a fantastic job today learning 3-digit subtraction. We focused on 'no-borrowing' problems to build confidence in place value logic. Yuki can now tackle big numbers like $856 - 231$! Please encourage Yuki to complete the homework on the portal to keep the momentum going.
