

Penjumlahan 3-digit tanpa Simpan (Regrouping) - Yuki

Created: 04/07/2026

Student

Student: Yuki

Topic: Penjumlahan 3-digit tanpa Simpan (Regrouping)

Status: completed

Lesson Plan

Learning Objectives

- Calculate the sum of two 3-digit numbers using vertical alignment without regrouping.
- Solve mental math problems involving additions of full hundreds (e.g., $300 + 400$).
- Model 3-digit addition using place value concepts (Hundreds, Tens, Ones).
- Solve simple word problems involving addition of 3-digit numbers in real-world contexts.

Lesson Information

Lesson Sections

1. Spiral Review Warm-up (10 minutes)

Teacher Script:

Hi Yuki! Welcome back to our math adventure. Before we start our new mission, let's play a quick 'Brain Warm-up' game! I'm going to show you some numbers and cards on the screen. For our first challenge: Can you tell me the place value of the underlined digit in $4\text{<u>5</u>}2$? Correct, it's 5 tens! Now, let's look at numbers 1-20. What is 15 minus 3? Great job! We are ready to build big numbers today!

Activities:

- Check 1 (Place Value): Identify H, T, O in 781.
- Check 2 (Place Value): What number is 3 Hundreds, 0 Tens, and 9 Ones?
- Check 3 (Numbers 1-20): Find the missing number in the sequence: 12, 13, __, 15.
- Check 4 (Numbers 1-20): Quick mental add: $8 + 7$.

2. Introduction & Real-World Connection (5 minutes)

Teacher Script:

Yuki, imagine you are the manager of a giant Toy Factory! Today, we received a big order. We have 200 blue blocks and 300 red blocks. How many blocks do we have in total? We are going to learn how to add these big 'Hundred' numbers super fast, just like a pro engineer!

Activities:

- *Visualizing 100s blocks on screen.*
- *Mental math challenge: $200 + 300$.*

3. Review of Prior Knowledge (5 minutes)

Teacher Script:

Remember our 'Place Value Houses', Yuki? We have the Hundreds house, the Tens house, and the Ones house. When we add numbers, friends stay in their own houses. Let's practice placing 143 into its houses on the screen. Drag the digits to the right room!

Activities:

- *Drag-and-drop digit placement for 143 and 251.*

4. Problem Introduction (10 minutes)

Teacher Script:

Now, let's try a big one! $123 + 245$. Look at how I align them vertically. We ALWAYS start from the smallest house—the Ones house. $3 + 5$ is 8. Then the Tens: $2 + 4$ is 6. Finally, the Hundreds: $1 + 2$ is 3. The answer is 368! See? No carrying, no hiding, just simple adding in each house.

Activities:

- *Step-by-step demonstration of vertical addition.*
- *Color-coding columns (Blue for H, Red for T, Green for O).*

5. Guided Practice (15 minutes)

Teacher Script:

Your turn, Factory Manager Yuki! Let's solve these together. I'll write the numbers, and you tell me the sum for each column. Let's try $412 + 376$. What is $2 + 6$? Good. What is $1 + 7$? Awesome. And $4 + 3$?

Activities:

- *Solving 3 problems together: $501 + 288$, $643 + 125$, $222 + 777$.*

6. Independent Practice (15 minutes)

Teacher Script:

I'm going to set a 5-minute timer. Try to solve these 4 'Toy Orders' on your screen. Use your digital pen to write the answers in the boxes. You've got this!

Activities:

- *Worksheet: $110 + 880$, $452 + 547$, $333 + 666$, $805 + 194$.*

7. Consolidation & Reflection (5 minutes)

Teacher Script:

You were amazing today, Yuki! You added huge numbers like they were nothing. Remember, always start with the Ones! Before you go, please don't forget to join <https://learn.algonova.id/login> to check your fun reward stickers and your homework. See you next time!

Activities:

- *Recap of the 'Start with Ones' rule.*
- *Directing student to the login portal.*

Homework

Medium Questions:

1. $213 + 452 = ?$
2. $704 + 182 = ?$
3. $335 + 261 = ?$
4. $520 + 468 = ?$

Hard Questions:

1. A toy shop has 124 teddy bears and 255 toy cars. How many toys are there in total?
2. $671 + 328 = ?$
3. Solve: $400 + 500 + 11$ (Think about the houses!)
4. Find the missing digits: $1_3 + 24_ = 385$
5. $812 + 187 = ?$
6. Yuki has 444 blocks and gets 555 more. How many blocks does Yuki have now?

Answer Key:

- ` $213 + 452 = 665$ `
- ` $704 + 182 = 886$ `
- ` $335 + 261 = 596$ `
- ` $520 + 468 = 988$ `
- ` $124 + 255 = 379$  total toys`
- ` $671 + 328 = 999$ `
- ` $400 + 500 + 11 = 911$ `
- `Missing digits:  $183 + 242 = 385$  (8 and 2)`
- ` $812 + 187 = 999$ `
- ` $444 + 555 = 999$ `
- REVIEW: Place Value - `7 Hundred, 2 Tens, 5 Ones = 725`

REVIEW: Place Value - `Value of 9 in 902 is 900`
REVIEW: Place Value - `Compose  $400 + 20 + 8 = 428$ `
REVIEW: Place Value - `Which is bigger? 561 or 516? (561)`
REVIEW: Numbers 1-20 - ` $19 - 7 = 12$ `
REVIEW: Numbers 1-20 - ` $11 + 6 = 17$ `
REVIEW: Numbers 1-20 - `Step counting: 2, 4, 6, 8, 10`
REVIEW: Numbers 1-20 - `What comes 2 before 20? (18)`

Parent Reminder

Today's Big Number Mission!

Hi! Today Yuki learned to add 3-digit numbers up to 999 without regrouping. We used a 'Toy Factory' theme to make big numbers less intimidating. Yuki did a great job keeping digits in their correct 'Place Value Houses'. Please check the portal for a short homework to keep the momentum going!
